Notes

This is not a complete list of Tennessee birds found at Edgar Evins State Park. Other species may be found. If you identify a species that is not on this list, please contact Ranger Mark Taylor at Mark.Taylor@tn.gov. Please list where on the park you found the species, date, weather conditions and preferably a picture of the species to have it included on this list.

Edgar Evins State Park Bird List

Welcome to the exciting world of bird watching at Edgar Evins State Park! Edgar Evins encompasses over 6,000 acres of hardwood forest in the Caney Fork river valley. The park is home to over 140 species throughout the course of the year, including the declining Cerulean Warbler. A variety of other habitats can also be found, such as bottomlands, high ridges, bluffs, brushy fields, lakeshores and open water. Due to this diversity, bird enthusiasts can spend hours on end observing birds in their natural habitats. Birds can be viewed practically anywhere in the park, but the premier locations include: the observation tower, trails, roadsides, boat ramps and lakeshores. We also offer guided bird tours throughout the spring and summer months (inquire at the park office). Please enjoy your stay. Happy birding!
